Bryan,

I have reviewed this document and discussed it with Rich Neville, the wetlands biologist for DEP NWRO Permits and Technical Services Section. We have no concerns with the Environmental Assessment and proposed plan. If you have any questions, e-mail or call at 814 332-6152.

Ed,

Have you or anyone in Meadville had a chance to read through this Environmental Assessment from the NRC yet. It sounds like this issue has already been looked at by someone in the region prior to this becoming an NRC issue. I have looked through it from a radiological standpoint, and it really is not a change from their current approach. The only difference is the potential impact of excavating in a wetland, and that has no radiation dose consequence. If you can, please let me know if anyone has looked at it or is planning to take a look. As Bob stated NRC has asked for a quick turnaround on this. We usually try to accommodate them if we can. Especially if it has the potential to greatly hinder cleanup activities. And if you just need more time, I will call NRC and tell them that we need more time to provide an adequate response. Thanks Ed, and let me know if you have any questions.

Bryan

Bryan/Ed,

Can you turn this around by the end of next week?

Bob

Subject: Environmental Assessment for Amendment to Whittaker License

Bob:

Attached is a draft EA for an amendment to Whittaker Corporation's NRC license. The amendment is for the revision to their Erosion and Sediment Pollution Control Plan, which is tied down to their license. I understand that they have previously provided PADEP with this plan as a revision to their Site Restoration plan. So, the change to this plan is essentially playing catchup with the NRC license.

I have discussed this matter with Bryan Werner and also with Ed Orris in you NW regional office.

Please provide this draft EA to the appropriate personnel for review and comment. I would welcome Ed's review in addition to Bryan's, if you feel that is warranted.

I hate to ask for a short turnaround, but I am doing that for this case. Please let me know if I am out of line asking for comments by the end of next week. We are expediting this amendment at the licensee's request, since they are holding up decommissioning activities within the wetlands until this action is completed.

Thank you for your assistance,
Marjorie
