outside scope

Braidwood	Braidwood Groundwater Contamination – The licensee continues to suspended all radioactive liquid discharges. On 1/26, the licensee provided a letter to 2700 residents describing the incidents, developed a WEB site for communicating information, and plans to conduct a Community Information Fair later in February. Region III plans to complete radiation safety inspection activities in February and determine any enforcement actions, as appropriate.	Steve Orth	12/01/05

outside scope

6-11

Braidwood	Tritium found in groundwater offsite.	Steve Orth	12/01/05	<p>The licensee has suspended liquid radwaste discharges since the groundwater contamination was identified on November 30, 2005. Liquid radwaste is being stored onsite in temporary storage tanks. Radwaste discharges will not resume until the blowdown line integrity is verified. A licensee meeting with nearby residents took place on December 12, 2005, which Region III staff and State officials attended. NRC split-sample analyses are ongoing, as are NRC inspection activities to assess the licensee's recovery efforts and plume characterization. Members of the Region III staff will participate in a meeting between and Illinois Environmental Protection Agency and the licensee on December 20, 2005 in Springfield Illinois, to discuss the licensee's remediation plans.</p>
