Subject: N. Shah's notes from Braidwood Meeting on Monday

Release

John, Wayne,

In reading Nick Shah's notes from Monday evening's meeting, there appears to be a reference to a deeper well (25ft) with a 200,000 picoCuries per liter result. This seems very high for the 2000 or 1998 leaks. Is this a real value? Do we have any insights for correlations?

Steve
