Subject: Draft tritium URI writeup for inspection report

Release

Hi John ! I have attached a draft of the writeup I came up with for the Bwd tritium issue. Since this is a joint DRP/DRS product, please take a look at it and make any changes you think are necessary. I am not sure how this input is to be treated--i.e., as an official input signed out under Steve or just something we both work on under a "gentleman's agreement." Until Rick/Steve work that out, I figure we can at least agree on a writeup.

Call/e-mail me if you have any questions. Please note, our inspection period ends January 31 and our exit meeting is on January 9.

thanks...N
