Subject: Re: Carl's Braidwood Question

Steve:

The question was, does Braidwood have a 50.59 review for the waste storage tanks. I was told by Ken Ainger that they do and I requested that he fax us a copy of it. Some of the tanks are in the turbine building and some are outside in a bermed area with heat tracing.

John,

I'm not certain of the question.

We should pull the string on Carl's 50.59 question from today's division meeting. I don't know what the current radwaste storage situation is.
