Steve,

We caught that in our additional internal reviews of the presentation, too. There are 11 wells with readings > 20,000 pCi/L (three of them are off our property, eight are on our property). The three offsite readings > 20,000 pCi/L are within that "ring" just north of Smiley Road.

Ken

Ken,

I carefully reviewing the slides after yesterday's meeting. One of the slide indicates that 11 offsite wells were greater than 20,000 picoCuries per liter. Are all 11 of those within that ring that is just north of Smiley Road? This seems like a rather large number of wells for a small area. Or, are they elsewhere as well?

Hello to all, Ken Ainger of Exelon has indicated that they plan to have a meeting with the 14 residents whose private wells were sampled in December. The meeting will be on January 26th at the station concerning the tritium release issues. Ken requested a meeting with State Officials and the NRC in Springfield on January 23 to go over what Exelon plans to present to the well owners and provide the opportunity for comment.

Meeting times is 1:30 on the 23rd in the Mississippi River meeting room at IEPA. Enter through the atrium off of North Grand Av. Have security contact Karen Cox once you have arrived. If you would like to participate via phone the information is provided below. I will provide
