Subject: Response to Bwd individual sampling request

Steve, I spoke to *Edie* re: sampling at her home. She stated that her husband wished to read the letter being sent out by Exelon, before taking any further action. I gave her my contact info and asked that she contact me if after reading the Exelon letter, they wished to continue with the sampling.

While on the phone, she asked some general question re: the tritium contamination (half-life, health effects, etc). I basically gave her a brief summary of what was discussed at yesterday's meeting re: that info and she appeared satisfied.

thanks...N
