Re: Docket No. 03030258

45-24949-01/2006001

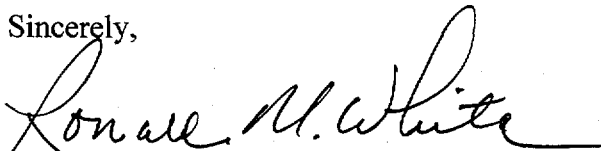

Dear Mr. Kinneman:

In response to the above referenced notice of violations, I have instituted the following actions:

- A. License Condition 13.A: Sealed sources testing shall not exceed six months. We now have an "auto shipment of leak tests" agreement with our service provider. In addition, our RSO will scheduled and perform the tests within 30 days before the six-month requirement.
- B. 10 CFR 20.1101(c) Annual Review of Radiation Program: The RSO shall perform an annual audit in accordance with the areas applicable in Appendix F of NUREG-1556. In addition he shall provide an executive summary of his findings.
- C. 10 CFR 71.5 (a) Shipping Papers Recognizable by Authorities: The blue folders in all of our vehicles are replaced with transparent folders. The first page contains the words "BILL OF LADING MATERIAL SAFETY DATA SHEET".

We believe these corrections will insure compliance with our materials license.

Sincerely,

Ronald M. White
President
