RE: New License -- Michigan Hemotology and Oncology

030-37211  
21-32620-01

Inst.

My duties at the Michigan Hemotology and Oncology Clinic, will be as physicist and Radiation Safety Officer. I feel very comfortable with my duties as RSO at this facility, and the other Broad Scope license I oversee. I plan on spending 6-12 visits per year, each visit will be of a 1/2hour- 2hour time frame, at this location, with the majority of my RSO work spent on education of staff, and compliance of Homeland Security. I will also assist with the set up of the facility once the license is approved. I am always available by cell phone and pager (24/7), and have backup when I rarely take a vacation. I will be available most days within a 1/2 hour time frame if there was an emergency, and on others, I should be within 50minutes, if I am out of town, I will have backup thru Ray Carlson's, RPS, group. I will also rely on the site technologist, which I will help to interview and place. If you have any further questions, please feel free to page me at 313 609-2038 or cell 586 215-5947.
