

UNITED STATES NUCLEAR REGULATORY COMMISSION

REGION III 2443 WARRENVILLE ROAD STE 210 LISLE, ILLINOIS 60532-4352

JUN 1 9 2006

James H. Garner Radiation Safety Officer Granger and Associates, Inc. 224 S. Main Street Cheboygan, MI 49721

SUBJECT: TERMINATION OF YOUR NRC RADIOACTIVE MATERIALS LICENSE.

LICENSE NO. 21-20302-01

Dear Mr. Granger:

By letter dated March 29, 2006 (with enclosures) and additional information (including attached leak test records) submitted by facsimile on June 15, 2006 (in response to Conversation Record, also dated June 15, 2006), you requested that we terminate your NRC radioactive material license, License No. 21-20302-01, (having expiration date of June 30, 2013). This license authorized portable gauge use/storage at your facility located at 224 S. Main Street. Cheboygan, Michigan, and usage at temporary job sites of the licensee anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for regulating the use of licensed material. In the referenced documents, you provided information confirming the transfer (on March 20, 2006) of all licensed material (two portable gauges) to another licensee authorized to possess the material, along with copies of leak test records, current as of the time of transfer, confirming the non-leaking status of the sealed sources transferred. You also confirmed that no licensed material remains in your possession and that no leaking sealed sources were ever in possession of Granger and Associates, Inc. Based on information you have provided to us, we have concluded that licensed material is no longer used or possessed under NRC License No. 21-20302-01 and that your facility meets NRC criteria for release for unrestricted use, permitting us to terminate the license as requested. Accordingly, an amendment is enclosed, terminating your NRC License No. 21-20302-01.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html (the Public Electronic Reading Room).

Sincerely,

Loren J. Hueter

Materials Licensing Branch
