Hi Leigh,

Thank you so much for your Open Cases that are in an Inactive Status. I appreciate your closing old cases to represent case status.

Sue

Hi Sue,

[REDACTED]

o/s

Another case that might fit the bill is EA-04-131, Nebraska Public Power District (Cooper). It involves one GREEN finding with an associated violation (NCV) of Criterion V for inadequate written instructions for restoring service water to operable status following maintenance. This case is on hold (i.e., inactive) pending a review of circumstances surrounding the finding via a Commission D-Note. After completion of this review, the Region will issue a letter with a GREEN finding, and the associated violation will be dispositioned as an NCV. (I'm not certain if the Commission D-Note has actually got up yet, but I've asked for a status.)

That accounts for 3 of the 13 old cases that were recently to me. As you may recall, I closed 4 old cases about a week ago, and I believe the remaining 6 can be closed with a little more research and some information from the Regions. I'll keep you posted.

Leigh

Are there any Enforcement Actions that are currently Open in EATS but do not have recent Activity, i.e., EA-98-562 - Entergy Operations, Inc. is in a Deferred Status because a generic hot shorts issue has yet to be resolved.

We are trying to identify and track Open Cases that are not in an Active Status.

Can you provide EA Case# with Licensee name, by Monday, April 11, 2005.

Please let me know if you have any questions.

Thank you.

Sue Bogle
