Conversations with Wm. Koenig, RSO on several
occasions, the last being on May 12, 2006.

The reviewer originally called the RSO on March 15, 2006, to fax the 6 questions in NUREG 1556, Vol. 15 concerning change of control (COC) of an NRC license. Several phone conversations were made to followup on the status of the response. Finally, the licensee responded on May 31, 2006, answering the 6 questions. The reviewer did inform the RSO that they were in violation with 10 CFR 30.34(b) in that the COC occurred in 12/05 prior to NRC granting consent. The licensee acknowledged that fact and explained that the merger took place without the knowledge of individuals in charge of the radiation safety program. It appears from the information provided that consent should be granted and the amendment is issued. In addition, the reviewer called the RSO on 6/16/06 to inform him that the late notification was not going to be cited and that all gauging devices are now list specifically on their NRC license. This information was left in a voice mail and the RSO will call back if there are any questions.

James R. Mullauer, 6/1/2006
