

INTERVIEW REPORT

OF

[REDACTED] a former [REDACTED] at PSEG's Hope Creek Station, was telephonically contacted by the Reporting Agent (RA) regarding his knowledge of potential problems with the Safety Conscious Work Environment (SCWE) at Hope Creek. [REDACTED] worked at the site, at Hope Creek, from [REDACTED] [REDACTED] started as a [REDACTED] and then obtained an [REDACTED] and worked as a [REDACTED] until the mid [REDACTED]. He then held an [REDACTED] position until February [REDACTED] at which time he was promoted to [REDACTED]. He left PSEG in May [REDACTED] to pursue a career in [REDACTED].

[REDACTED] reported that he worked closely with Dr. Kymn HARVIN in the last six months he was there. He has had recent contact with her. To his knowledge, Dr. HARVIN has the most concerns with respect to safety. [REDACTED] was asked if he spoke with anyone else in Operations at Hope Creek that had similar concerns. He responded that [REDACTED] at Hope Creek, does not have the same level of concern "safety wise" as Dr. HARVIN, but felt negative toward the way the place was set up and run and the way senior management worked. He did not believe [REDACTED] had any nuclear safety related issues. [REDACTED] also offered that former Hope Creek [REDACTED] would be able to offer "the real picture" along with [REDACTED]. He trusted both men greatly. [REDACTED] believed [REDACTED] had concerns regarding the management of the place, but not to the same depth as [REDACTED]. Further, [REDACTED] would include himself as needing improvement. He was not aware of any specific nuclear safety concerns of [REDACTED].

[REDACTED] stated that he trusts Dr. HARVIN as well and does not know anybody else at the site with nuclear safety concerns. He is aware of her concerns and has heard her descriptions and knows she believes there is a safety issue at the plant. He explained that his "quandary" is that others on site, more technically oriented than Dr. HARVIN, do not share the same belief.

[REDACTED] trusts the Operations Superintendents to give a true report of what is going on and suggested that if anyone will say how it is and raise a concern, the following people will [REDACTED]
