Professor Roger W. Staehle
22 Red Fox Road
North Oaks, MN 55127

Dear Professor Staehle:

On behalf of the U.S. Nuclear Regulatory Commission (NRC), I would like to thank you and express our appreciation of your recent 2-day seminar on electrochemistry and predicting materials degradation in steam generators and other nuclear systems to NRC's research and other technical staff.

Your seminar was the first of a series we have planned for this year to provide the NRC staff the opportunity to interact with technical experts on topics of interest and emerging issues in the nuclear industry. These seminars are a vital part of our knowledge management activities, a high priority at the agency.

You have certainly set a high standard for the presentation of these seminars. Based on comments I have received from my staff and other attendees at your seminar, your presentation was excellent and well received. The attendees thought your seminar was educational, thought provoking, and provided valuable, historical perspective.

Again, I thank you for your excellent lecture and your willingness to address and interact with our materials engineering technical staff.

Sincerely,

/RA/

James T. Wiggins, Deputy Director
Office of Nuclear Regulatory Research
