Release
EDO

Steve,
Thanks. The Chairman just had a question regarding this issue this morning. I may have some more questions for you after we review this info. Is it this afternoon that you are out? I don't think the phone call with Congressional staff will be until Thursday.

Beth

Attached is our response on tritium releases gathered from all four Regions and HQ. Also included is info on sites that discharged tritium onto their site, which did not go into the public domain. Additionally, I included a discussion on the effluent and environmental monitoring requirements as background info.

I am available to sit in on the call if needed, to discuss effluent and environmental criteria, etc. (except for a 1:30 to 3:30 Doctor's appointment).

Stu,
Peter's out in RIII at the residents' seminar and I'm his backup. Yes, please provide via e-mail and to both myself and Peter. We'll review it in OEDO before providing it to OCA.

Thanks,
Beth

Pete

From our discussion last week, I believe that the information on tritium release to unrestricted areas is needed for a followup phone call that will occur with Congressional staffers later this week.

If this is correct, can we provide the answer to you by e-mail?

Thanks
Stu
