 Subject: Fwd: Re: EPW Committee request for staff briefing

Tim,  
 See attached. Looks like you only received an excerpt of extensive e-mail trail on this topic. It's related to a growing congressional interest (particularly by several senators/staff on the E&PW Committee) for NRC to conduct an Independent Safety Assessment at Indian Point and at Vermont Yankee. The main focus of the briefing is not on tritium, although the continuing tritium issue at IP has a lot to do with the growing interest for an ISA to be done at IP. I believe the tritium issue, as a main focus, may be addressed at another Hill briefing in the near future.

 Sam

Subject of this briefing is unclear. Is it tritium related? Is it just Braidwood, or more of an agency perspective? Or does it have nothing to do with tritium?

**From:** Samuel Lee  
**To:** Brian Holian; Stuart Richards  
**Date:** 2/14/06 1:55PM  
**Subject:** E&PW Committee briefing on IP, VY, MY ISA - may still take place on 2/16/06

*releasable*

Brian and Stu,  
OCA checked with Mary Francis Repko of the Committee to see if the meeting could be rescheduled to a later date. The word I hear is that the Committee would still like to have the meeting this Thursday, 2/16/06, at 4:30pm. We'll hear something more formal from the Chmn's office, so this is just a heads up.
