Subject: Proposed RIS re: Monitoring of Spent Fuel Pools and On-site Contamination

Steve... thanks for comments.

I wasn't trying to expand the scope of the RIS. I included the Braidwood issue because it serves as another example to licensees that they should be looking at onsite ground water. If it is not the spent fuel pool it can very well be something else.

I will modify draft and include comments.

thanks

Region I staff participated in the January 5, 2006, RES/NMSS/NRR Technical Assistance Group (TAG) meeting on Groundwater and Performance Monitoring. During the meeting we were requested to provide a copy of the Draft RIS that was developed by Ron Nimitz relative to Spent fuel pool leakage and structural integrity issues. Accordingly, please review and provide comments to Ron Nimitz.
