Dear Mr. Virgilio:

Enclosed is the first update of our Program Improvement Plan, submitted as required by the heightened oversight process. The following are our accomplishments since we submitted our original plan, which was received by the NRC on February 1, 2006 (for ease of reference, in this update, we have numbered the Tasks and Milestones):

- We have completed Milestone 1.1. We have written a rulemaking initiation memorandum (RIM), which outlines the rulemaking we propose to undertake. The RIM has been approved by our Division Director and Counsel's Office. It is now in the Department's Executive Office for review and approval.
- In writing the RIM, we compiled a list of the NRC rules to be adopted, as well as a concise summary of the other updates and changes needed in our rules. This will be our starting point for writing the preliminary draft express terms, for Task 3, once the RIM is signed by the Commissioner.
- On March 7, 2006, we submitted to the NRC our explanation of the authority we have to implement the deliberate misconduct rule (RATS ID 1998-1). The NRC advised us on April 25, 2006 that the authority we had cited did not meet two of the essential objectives of the Deliberate Misconduct Rule. We will revise our regulations accordingly, and we have included the deliberate misconduct rule in the RIM

We were late in completing Milestone 1.1, due to some other matters that required immediate attention. However, this has not affected the overall schedule for the rulemaking. The only dates that have changed are the anticipated completion dates for Milestones 1.2 and 2, that is, the RIM approval and the scoping meeting have been postponed by one month. The rest of the plan remains the same, and our completion date has not changed.

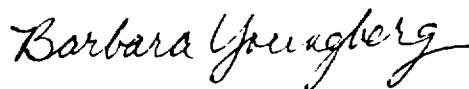

Template: EDO-001

E-RIDS: EDO-01

As we explained in our January 31, 2006 letter, we recognize the need to adopt these regulations, but our delay in doing so has not impaired DEC's ability to protect the environment or the public from radiation hazards.

We appreciate the NRC's assistance regarding the deliberate misconduct rule. If there are any questions on our updated plan, please contact me.

Sincerely,

Barbara Youngberg  
Chief, Radiation Section

Enclosure
