Jim,  
We tried to reach John and you earlier this morning on splits.

We are still working out the details with DOH, but I suspect that we will continue to do H-3, Sr-90, Gamma Spec, and possibly add Gross alpha and Gross beta. Nothing else.

Hopefully we will be able to give you a more definite answer later today.

I will be out of the office (coming down with a nasty little cold) but Barbara will be here. Again, we can't commit to a definite plan until we consult with DOH. DOH needs to be on the call as well since it is their lab, and they will have to speak to LLD's.

I will let Barbara know about your request to talk later. Note: we have a meeting internally at 1:30, so 2:00 may be a little tight. I will leave it up to you and Barbara to work out a time.

Tim

Dear Tim,

In addition to agreeing on radionuclides to sample for, we need to discuss MDC sensitivity and how many samples are we committing to. John White will be in the office Friday afternoon. Let's shoot for 2:00?

Regards,

Jim
