Subject: MW-42/NCD/U-1 SFP

Hello Bill,

Could you provide a copy of the most recent analysis results of the U-1 NCD water, and the U-1 SFP water?

Also, in light of the NRC's just reported preliminary Ni-63 hit at MW-42, could you tell me if Entergy analyzed for N-63 in that well, the NCD, and U-1 SFP, and if so what the results were?

Thanks,
Tim

BTW - With you leaving this Friday, what will the new organizational division of work be, and who should I work with from here on?

Best of luck in retirement. You certainly deserve it after this job!
