RE: Application for Specific License for the Export of Americium in amounts exceeding SI Limits – NRC 10 CFR, Part 110

Deputy Director,

Halliburton Energy Services, Inc. is applying for an amendment to License CBP0008b-01; we had a legal entity name change to our subsidiary in Brunei. While our subsidiary was known as Mashhor Well Services Sdn Bhd, it is now known as ESG Sdn Bhd. This license is to export, and import [REDACTED] Americium-241 and Americium-241/Be for shipments that are in excess of the [REDACTED] threshold. These materials are used to calibrate down hole well logging equipment, for the completion of an oil or gas well prior to production, or the enhance production of existing wells. These items are subject to the export license jurisdiction of the U.S. Nuclear Regulatory Commission. Enclosed please find Halliburton check in the amount of \$300.00 (Three hundred dollars) as the fee for the amendment for this license.

The NRC – Controlled Items are currently in the possession of either Halliburton Energy Services in the United States or subsidiaries in application/license (CBP0008b-01) countries. The NRC Controlled Items that are currently abroad were authorized for export from the United States by an NRC General License under the conditions of Title 10, Part 110.23 of the Code of Federal Regulations. Following the export of these materials, the material will remain in the custody of Halliburton employees and when not mobilized in support of field activities will be stored in a secure Halliburton facility.

Halliburton Energy Services in consideration of Title 10, Part 110.42 (c) of the Code of Federal Regulations submits that the NRC-Controlled Items proposed for export are not inimical to the common defense and security of the United States and the proposed exports are consistent with the policies and objectives of the United States Government.

Halliburton

Included in the application package please find a completed and signed copy of NRC Form 7, "Application for License to Export Nuclear Material and Equipment," with attachment, copy of the Entity Certificates and a copy of License CBP0008b-01.

If you should have any questions please do not hesitate to call or write at the above number or address.

Sincerely,

A handwritten signature in black ink that reads "Cindy Dorris". The signature is fluid and cursive, with the first name "Cindy" being more prominent than the last name "Dorris".

Attachment 1
USNRC Form 7, Items 16 – 23

Halliburton's license application criteria is based on specific shipments that exceed NRC threshold limits as per 10 CFR Part 110. Our current inventory includes [REDACTED] Ambe sources that will require this license for all exports, re-exports, or imports returning to the U.S.

The new regulation requires the use of the 'sum of calculation's methodology for multiple or consolidated shipments. Halliburton has several Ambe sources that are less than the threshold but could exceed the limits if consolidated.

Description	Unit Value (rounded)
[REDACTED] Am241Be Logging Source used with dual spaced Neutron Tool.	\$4,000.00
[REDACTED] Am241Be Logging Source used with dual spaced Neutron Tool	\$500.00
150 millicurie Am241 source for use with the Fluid Density Tool	\$1,500.00
.1 millicurie Am241 calibration source for tool calibration	\$2,200.00
[REDACTED] Am241Be sealed source with transport shield used in Compensated Neutron Porosity Tool (CNPh)	\$8,000.00
[REDACTED] Am241Be sealed source with transport shield used in Compensated Neutron Porosity Tool (CNPh)	\$5,500.00
100 millicurie Am241Be sealed source installed in Compensated Thermal Neutron (CTN)	\$600.00
