**MEETING REPORT
JACOBI CONSULTING/EVEREST RESOURCE COMPANY**

DATE: June 26, 2006

TIME: 6:00 p.m. to 7:00 p.m.

PLACE: Four Points Sheraton Denver Cherry Creek
Empire Room
600 South Colorado Boulevard
Denver, CO 80246

PURPOSE: Sidebar meeting to discuss the use of intentional soil mixing to meet unrestricted release criteria for radium.

ATTENDEES: See Attachment 1

BACKGROUND:

DISCUSSION:

1. Jacobi and Everest discussed with Nuclear Regulatory Commission (NRC) staff a decommissioned ISL site that contained a 25-acre irrigation area. Radium was not removed from the water prior to irrigation; therefore, the site became contaminated.
2. Because excavation and disposal was too expensive (~10 million dollars), soil mixing per NUREG-1757 is being considered. NUREG-1757 allows soil mixing at decommissioning sites to meet unrestricted release criteria under certain circumstances.
3. NRC stated that it would likely review such a request made to the State of Texas by Everest Resource Company.

ACTIONS: None
