Stephen Cohen:

Thank you!

Attached below please find an image taken at approximately 9:00 am this morning of the North wall of the Catchment Basin excavation at a depth of approximately 40 feet below surface (approximately 6602 feet above Mean Sea Level).

The dark staining is due to seeping kerosene in the planned North wall of the excavation. A cellular telephone has been included for scale. The excavation will be expanded to the North beyond its originally planned limits to capture this material.

Oscar:

This e-mail acknowledges the receipt of your license amendment request dated June 7, 2006 for a 5-year postponement of the "Timeliness in Decommissioning" provisions of 10 CFR 40.42(d). U.S. Nuclear Regulatory Commission (NRC) staff is reviewing your submittal, which should be completed by the end of July 2006. If we have any questions or comments, we will forward them to you under separate correspondence. Please contact me if you have any questions.

Sincerely,

Stephen J. Cohen, PG
