RE: Materials Testing, Inc. Milford, CT
License No. 06-19909-01 Amendment

03019515

Dear Mr. Lodhi:

Materials Testing Inc. will amend its license to reflect nuclear gauge use when not in use. As per our discussion over the phone, you recommended that we make the following change/addition on our license: During long term projects, if the client can provide a locked storage facility that is controlled only by MTI personnel, then the gauge will be stored on site. However, if this is not possible, then the inspector(s) shall keep the gauge double chained/locked and stored in their locked vehicle either in their driveway, or in a locked garage.

Very Truly Yours,
Materials Testing, Inc.

Karl Hernandez
Quality Manager
