SANDRA GABRIEL
LICENSING ASSISTANCE TEAM
DIVISION OF NUCLEAR MATERIALS SAFETY
U.S. NUCLEAR REGULATORY COMMISSION, REGION I
KING OF PRUSSIA, PA 19406-1415

SUBJ: Additional information to License NO. 52-25019-01 Docket
Number 030-30826

In reference to the letter of June 12, 2006 we clarified the following:

Our license has two areas of use for medical use of byproduct materials which are located in the first floor and in the ground floor of the hospital.

The content in the letter of June 12, 2006 is only to release the area of use for medical use of byproduct material located in the first floor (Old area of Nuclear Medicine) of the hospital.

The second topic contained in the letter of June 12, 2006 is the change of name of the Hospital HIMA to Hospital HIMA - San Pablo - Caguas.

HIMA Hospital acquired the San Pablo Hospital assets. This transition of assets neither will have any effect in the activities of HIMA license program and no effect in the license of the San Pablo Hospital.

Therefore there will not be transference of control of power that affects the activities of our license.

Please see the attachment A (APPENDIX F) for more information.

139093

NMSS/RGNI MATERIALS-002

We expect your prompt response and approval. For any additional information please call me at (787) 432-9320.

Sincerely,

A handwritten signature in black ink, appearing to be 'Carmelo Pérez', with a stylized, looping flourish at the end.

Carmelo Pérez
Physicist, RSO
Hospital HIMA - San Pablo - Caguas

HIMA HOSPITAL
Caguas Puerto Rico, 00726

APPENDIX F

1. Provide a complete description of the transaction (transfer of stock or assets, or merger). Indicate whether the name has change and include the new name. Include the name and telephone number of a licensee contact who NRC may contact if more information is needed.

HIMA Hospital acquired the San Pablo Hospital assets. This transition of assets neither will have any effect in the activities of HIMA license.

The name of HIMA Hospital is Hospital HIMA - San Pablo - Caguas.

The licensee contact is Carlos M. Plñeiro (787) 653-1796.

2. Describe any change in personnel of duties that relate to the licensed program. Include training and experience for new personnel.

N/A. (Any Change).

3. Describe any changes in the organization, location, facilities, equipment or procedures that relate to to the licensed program.

N/A. (Any Change).

4. Describe the status of the surveillance program (surveys, wipe test, quality control) at the present time and the expected status at the time that the control is to be transferred.

N/A.

5. Confirm that all record concerning the safe and effective decommissioning of the facility will be transferred to the transferee or two NRC, as appropriate. These records include documentation of surveys of ambient radiations levels and fixed and/or removable contamination, including method and sensitivity.

N/A.

6. Confirm that the transferee will abide by all constraints, conditions, requirements and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

N/A.

¡Nadie te cuida como nosotros!

RECEIVED
REGION I
2006 JUN 15 AM 10:33

Subject: Decommissioning Operations in the Old Area of Nuclear Medicine
Department (License No. 52-25019-01 Docket Number ~~030-308216~~ ^{RIS} 03030826)

Enclosed you will find the documents which certify our hospital's name change.

The following reports are submitted for your evaluation, approval and the corresponding certification:

1. WIPE TEST REPORT

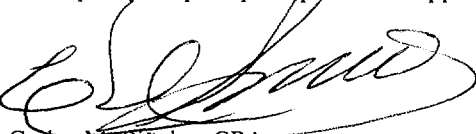

The test was done at the former Area where the facility for Nuclear Medicine department was located. The purpose of the test was to determine the level of contamination in the area. The contamination level is presented in dpm/100cm². The equipment used for the wipe test was uptake well counter CAPINTEC Model CAPTUS-600 Spectrometer S/N: 600201 sufficiently sensitive to detect the presence of 200dpm/100cm² of removable contamination and efficiency of 95%.

2. SURVEY TEST

The test was done in all marked area as shown in the map included. The survey instrument used for the test was LUBLUM M-14C S/N: 0-51-014, Package Probe: M-440AP. It is sufficiently sensitive to levels lower than 0.01 mR/hr. The radiation Levels in mR/hr.

In conclusion, there is no contamination in tested area and the survey test presents values below 0.02 mR /hr. For these reasons, we think the area can be used for other purposes by the institution.

We expect your prompt response and approval. For any additional information, please call us at (787) 653-1796.
