Subject: Schlumberger Source Abandonment

Took call at 2:05 pm today from Tom Wood, 281-285-7460

Wireline source abandonment in Campbell County, Wyoming.

Well owned by Petrogulf. Well No. HITT #2, API 04900557286

They have been fishing since 6/25. The tool broke in half. They recovered the AmBe source, but the 1.6-Ci Cs-137 is in top half of tool at about 10,680'. Top of tool is at 10,679'. Bottom is at 10,699'.

They plan to run a gamma tool down the drill pipe to make sure the source is not loose above the tool, although they do not suspect that.

They have a pay zone in the range 10,532 to 10,552', so they want to work around that. They plan to run casing from 10,679 to 10,560 and fill the casing with cement (120'). They will weld a hardened steel polished rod in the casing at about 10,650, and a similar deflection device in a crowsfoot configuration higher before the pay zone.

I gave permission to abandon, and Wood promised to send the standard 30-day report.
