Dear Mr. McCann:

Subject: Update on retirement and changes of several BCLDP Environmental Procedures.

Mike, per your request and for your informational purposes I am writing this letter to inform the NRC of either the retirement or changes to the following environmental procedures in the BCLDP Program:

Retired

- EM-SP-001 "Collection of Environmental Air Samples for Radiological Analysis"
- EM-SP-008 "Beta-Gamma Radiation Monitoring"
- EM-SP-011 "Collection of Environmental Sediment Samples"

These procedures were retired on July 1, 2006 based on the fact that there is no longer any radiological source term on site to monitor within the parameters of these procedures.

Field Changed

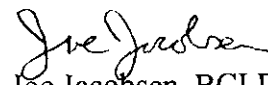

- EM-SP-002 "Collection of Environmental Water And Liquid Effluent Samples for Radiological Analysis"

This procedure was changed effective July 1, 2006 to remove the requirement to perform radiological sampling of the West Jefferson North Site sewerage system as the potential source terms have been removed as part of the site decommissioning work.

The BCLDP QA procedure process was applied to the retirement/field changes of these procedures including the required review prescribed in HP-AP-36.0 "Control of Revisions to Radiation Protection Program Documents."

If you have any questions or comments please do not hesitate to call me at 614-424-4098.

Sincerely,

Joe Jacobsen BCLDP RSO
