Hilden, as rapporteur at Convention, mentioned in his Plenary Presentation the great job done by the FSC and recommended to consult the FSC WEB page. In particular, he recommended reading the documents on the Workshop held in Belgium, as the partnership approach was felt to be a good practice in the country group concerned.</i></p> <p><i>Finally, attention is called to two international conferences being organised through the NEA/RWMC: on the safety case (January 2007) and on political and technical progress in geologic disposal (October 2007).</i></p>	<p>Room documents on International Conferences</p> <p>Inauguration speech of A. 14:40	7.	<p>FORMING A SUSTAINABLE RELATIONSHIP TO A LOCAL WASTE MANAGEMENT FACILITY : THE VAP (VALUE ADDED PROJECT) INITIATIVE OF THE FSC <i>S. Chandler, FSC VAP Group</i></p> <p><i>In radioactive waste management, the greatest challenge may be to create a local operating facility that can survive over the generations—in both a technical sense and a societal sense. One necessary condition is that there should be a continued willingness to live with and maintain the facility. Building a long-term relationship can be facilitated by designing and implementing facilities in ways that reflect the values and interests of local communities. The FSC therefore has undertaken a study of value added to waste storage or repository projects. The concept is distinct from that of economic compensation. Work has been ongoing in this area since the latest session of the group and is proving to be of great interest to local communities, which have been providing input into the FSC study.</i></p> <p><i>The new updated text of the study will be presented and discussed by taking advantage of a panel of distinguished experts representing different view points. Plans to bring the project to fruition will be described.</i></p> <p>a. The FSC VAP Initiative: main messages, contributors, and way forward <i>C. Pescatore and C. Letourneau, J. de la Ferté</i></p> <p><i>The FSC Group on Communication and Outreach has been working on a first flyer illustrating the FSC and its operations. A second flyer may illustrate the lessons learnt in a specific area, e.g., stepwise decision making. Subject to possible amendments adopted during the discussion, the FSC is asked to endorse the substantive content of the draft submitted and to agree to its later publication.</i></p> <p><i>Additionally, the issue has been tackled of how to standardise country reports to the FSC. A new table for collecting country information has been generated and tested based on previous country reports. The FSC is expected to decide on whether this type of table should substitute – or complement – the full yearly reports delivered by FSC members up to now. Also, it is suggested that the FSC decide to invite all members to review the model table as submitted, in order to collect possible comments and suggestions regarding its structure, type and length of content, for processing and final approval by the Core Group.</i></p>	<p>Room documents:</p> <ol style="list-style-type: none"> 1.
