Dear Mr. Killingsworth:

This refers to the special inspection conducted on June 20, 2006, at your facilities located in Lansing and Detroit, Michigan. The inspection was a follow-up to your report of a vehicle accident in which one of your moisture density gauges was struck by a motor vehicle while performing density measurements on I-75 south bound in Detroit, Michigan. The special inspection reviewed the circumstances surrounding the accident and the procedures used by your staff to respond to the accident and safely return the gauge to proper storage. Additionally, this inspection was an examination of activities conducted under your license as they relate to safety and compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspection consisted of selected examination of procedures and representative records, observations of activities, and interviews with personnel.

Based on the results of this inspection, the NRC did not identify any violations of the Commission's rules and regulations.
