MEMORANDUM TO: Sunil Weerakkody, Branch Chief
Fire Protection Branch
Division of Risk Assessment
Office of Nuclear Reactor Regulation

FROM: Tinh Dinh, Fire Protection Engineer */RA/*
Fire Protection Branch
Division of Risk Assessment
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF JUNE 9, 2006, CATEGORY 3 MEETING ON
TECHNICAL ISSUES CLARIFICATIONS ON POST-FIRE OPERATOR
MANUAL ACTIONS

On June 9, 2006, the U.S. Nuclear Regulatory Commission (NRC) staff held a meeting with stakeholders and the public to discuss the staff's draft responses (ML061440237 and ML061440251) to requests for clarifications of regulatory expectations of operator manual actions. The staff also discussed the regulatory issue summary on operator manual actions (ML061430404) and confirmatory orders issued to some licensee in 1998 to address fire barrier corrective actions.

The NRC staff has revised several of the draft responses to address stakeholders and public comments received at the meeting. The enclosures to this memorandum provide the final staff responses (ML061980016 and ML061980035).

Should you have any questions, please contact Tinh Dinh, technical lead, at (301) 415-2149.

A list of meeting attendees is also enclosed with this memorandum.

Enclosures:
As stated (3)
