ADM

equipment  
perf. issues - as best as can →

human perf. -  
sequence of steps -

"hand cuffed" - real business needs

rough people - to do on spot reviewing  
procedural compliance

operability calls

emphasis on production -

h

as line - recurring system operating issues -

NS-24

Windows - outages - descope  
Business decision - control pod driver

Ops - shut down - [redacted] - PSEG

addressed crew -

COB -

to apologizing for failure to scream  
- poor planning - one IPE

- normal for them to review perf. failure

- overall org. let sid. down let them,

unduly held people to scrutiny because not reported ^ perf. event

political

COB + Sr. mgt.

time frame - not known

Summary impression - event not reported

Aware of any other instances where Ops Mgt. faced pressure from Senior Mgt. or PSEG Power regarding operational decisions? (akin to bypass value issue)

Only mention of PSEG Power off weighing in on operational decision - are there others?

Why wouldn't you raise

Example - Ops Mgt. March 03
