ADM

equipment  
perf. issues - as best as can →

human perf. -  
sequence of steps -

"hand cuffed" - real business needs

rough people - to do on spot reviewing  
procedural compliance

operability calls

emphasis on production -

h

as line - recurring system operating issues -

NS-24

Windows - outages - descope  
Business decision - control pod driver

Ops - shut down - [redacted] - PSEG  
addressed crew - COB-

[redacted] to apologizing for failure to scream  
- poor planning - one IPE

- normal for them to review perf. failure

- overall org. let sid. down let them,

unduly held people to scrutiny because not reported perf. event

[redacted] political  
COB + Sr. mgt.  
[redacted]

time frame - not known

Summary impression - event not reported

Aware of any other instances where Ops Mgt. faced pressure from Senior Mgt. or PSEG Power regarding operational decisions? (akin to bypass / value issue)

Only mention of PSEG Power off weighing in on operational decision - are there others?

Why wouldn't you raise

Example - Ops Mgt. March 03
