Ŷ

The purpose of this modification is to make several changes to the Statement of Work. The changes that are taken place within this modification are done at a no-cost change as certain tasks are being deleted/revised and replaced with an equal mix of effort for the revised tasks. Accordingly the contract is modified as follows:

(1) Delete Task 3 in its entirety.

1

(2) Delete Task 4 in its entirety and replace with the following:

"Task 4. FCI Calculations for ESBWR and EPR Designs

The contractor shall perform reactor FCI calculations for the EPR design using the University of Wisconsin developed TEXAS code, and using initial and boundary conditions that are obtained from design documents and MELCOR plant calculations. Minor code modifications, as necessary, to address EPR design and geometry specific features shall be considered as part of this effort. The contractor shall also perform sensitivity calculations using parametric variations, and estimate a spectrum of steam explosion loads from the results of sensitivity analysis. The contractor shall document the results in a report.

For the ESBWR design, the contractor shall peer review plant calculations using the TEXAS code.

Deliverable: Letter report on EPR FCI calculations Estimated Completion Date: 12/31/2008 Estimated level of Effort: 10 person-months"

(3) Delete Task 5 in its entirety and replace with the following:

"Task 5. Analysis of Other EPR Severe Accident Issues

The EPR design has a few unique severe accident mitigation features, such as core catcher and segmented spreading chamber, to enhance core debris coolability. A proposed Organization for Economic Cooperation and Development (OECD) sponsored Melt Coolability and Concrete Interaction (MCCI) follow-on program is designed to investigate potential coolability enhancement by new design features such as the ones mentioned above. This follow-on program is experimental in nature and will generate a significant amount of data on debris coolability and two-dimensional core-concrete interaction. The contractor shall provide support to the OECD-MCCI experimental team in designing appropriate experiments, analyze the experimental data, and provide technical expertise to the OECD-MCCI project team in developing analytical models for incorporation into NRC's severe accident codes.

Deliverable: Letter reports documenting data analysis and model development effort Estimated Completion Date: 06/30/2008 Estimated Level of Effort: 6 person-months"

NRC-04-04-083 UW # 29110 Modification No. 1 Page 3 of 4

(4) Delete Task 6 in its entirety and replace with the following:

"Task 6. Expert Technical Support

4

Provide expert technical support, on an as-needed basis, to the NRC staff in the review of technical documents related to new reactor designs, including ESBWR and EPR presentations to ACRS (full committee and cognizant subcommittees), and preparation of safety analysis reports by the NRC staff.

Deliverable: As required Estimated Completion Date: 12/31/2008 Estimated Level of Effort: 4 person-months"

Delete Section VI "Technical and Other Qualifications Required" in its entirety and (5) replace with the following:

"TECHNICAL AND OTHER QUALIFICATIONS REQUIRED

For successful performance of this work, the contractor and its principal personnel should have considerable experience in fuel-coolant interactions (FCI) and related severe accident research areas pertaining to their applications to new reactor designs. Thus, the contractor's personnel should also have high degree of familiarity with new reactor design features, in particular, those relevant to addressing the FCI and related severe accident issues."

(6) Delete Section VII "Meetings and Travel" in its entirety and replace with the following:

"MEETINGS AND TRAVEL

The contractor may be required to travel to licensee design office sites as identified by the NRC Project Officer. The overseas travel will be coordinated with and authorized by the NRC Project Officer, subject to NRC travel requirements and limitations. The contractor will also be required to attend progress review meetings at the NRC headquarters during the performance period of the contract, and may be required to attend other technical meetings."

Delete Section VIII "NRC Furnished Material" in its entirety and replace with the following: (7)

"NRC FURNISHED MATERIAL

NRC will provide the contractor relevant design documents for new reactor designs including, but not limited to, ESBWR and EPR designs. These documents, in most part, will be proprietary and should be treated as such by the contractor. These documents shall not be re-distributed to personnel other than the contractor's staff involved in the project, and the information shall not be disclosed without prior approval from the NRC."

NRC-04-04-083 UW # 29110 Modification No. 1 Page 4 of 4

A summary of obligations from the date of award through the date of this modification is provided below:

FY05 Obligations "Award"	\$100,000.00	
FY06 Obligations "Mod 1"	\$100,000.00	

Cumulative Total of NRC Obligations \$200,000.00

This modification obligates FY06 funds in the amount of \$100,000.00.
