December 1, 1992

U. S. Nuclear Regulatory Commission
ATTN: Mr. George Bidinger
One White Flint North
Rockville, MD 20852

Dear Mr. Bidinger:

This letter confirms our previous correspondence to Mr. Scott Pennington on April 30, 1992 regarding commitments to the soil and groundwater investigation outside the southwest area of the Westinghouse Columbia Plant:

1. An additional monitoring well (W-38) will be installed in the vicinity of boring HC-5 as noted in our April report.

2. Soil outside the facility in the vicinity of HA-14 and HA-15 will be removed/decontaminated to a depth of approximately six feet.

It is estimated that these actions will be completed by March 31, 1992.

Our response actions listed in Section 4.0 of our April report have been completed. Please contact me immediately if you have any questions or concerns regarding this matter.

Sincerely,

WESTINGHOUSE ELECTRIC CORPORATION

W. L. Goodwin, Manager
Regulatory Affairs
