Dear Ms. Taormina,

Please confirm the following with regards to your RSC process for approval of irradiator facilities, users, and use:

1. Before using licensed materials, authorized users will receive training commensurate with that described in Appendix G in NUREG - 1556, Vol. 5, dated October 1998. Alternatively, you may provide the minimal training and experience required by the RSC.
2. The review of the facilities will ensure that the floor beneath a self-shielded irradiator is adequate to support the weight of the irradiator; each self-shielded irradiator is secured to prevent unauthorized access or removal; and each area where a self-shielded irradiator is located is equipped with an automatically operated fire detection and control system (sprinkler, chemical, or gas) or the location of the area and other controls ensure a low-level radiation risk attributable to fires.
3. Operating and emergency procedures will be developed, implemented, maintained, and distributed and will meet the Criteria in the section entitled, "Radiation Safety program - Operating and Emergency Procedures" in NUREG - 1556, Vol. 5, dated October, 1998. Changes to operating and emergency procedures will be reviewed and approved by the RSC and affected licensee staff will be trained in the procedures before they are implemented.

Please note that you may not reply to this e-mail by return e-mail. Your reply must be in writing by letter or facsimile (610-337-5269). If we do not receive a reply from you within 30 calendar days from the date of this e-mail, we will assume that you do not wish to pursue your application.

Thanks in advance,
Penny Lanzisera, HP
