Gentlemen:

In reply to your letter of August 22nd to Mr. W.F. Mittendorf noting certain items of noncompliance with regard to our Special Nuclear Material License SNM-185, we would like to state that corrective action has been instituted as outlined below:

Concerning Item 1, daily surveys of fabrication areas have been initiated as of July 29, 1960. A system has been setup to assure that every area within the fabrication section is surveyed at least once a week. When survey results so indicate, corrective action is taken to reduce personnel exposure either through shielding or removal to safe distances.

With respect to items 2 and 3, the proper signs and labels have been procured and posted in accordance with 10 CFR 20, sections 20.203 (a.), (f)(1), (f)(2), and (f)(4). This has been in effect since December 1959.

Records of air sample results have been maintained in units specified in Section 20.201 (b), as required by Section 20.401 (c) as of January 1960.

We trust that the corrective actions specified above will serve to establish us in full compliance with license requirements, and thank you for bringing these matters to our attention.

Very truly yours,

D. E. MAKEPEACE DIVISION

File copy to Mr. Delaney.
 PD Len. copy being a full in accord w/pt. 9.

 I presume DL&R action is responsibility of Red-Safety Branch - Be sure they get a copy of this report. 8/10/60
