

July 21, 2006

LICENSEE: AmerGen Energy Company, LLC

FACILITY: Oyster Creek Nuclear Generating Station

SUBJECT: SUMMARY OF MEETING HELD ON APRIL 20, 2006, BETWEEN THE U.S. NUCLEAR REGULATORY COMMISSION STAFF AND AMERGEN ENERGY COMPANY, LLC REPRESENTATIVES TO DISCUSS THE RESULTS OF THE AGING MANAGEMENT REVIEW (AMR) AND AGING MANAGEMENT PROGRAM (AMP) AUDITS FOR THE OYSTER CREEK NUCLEAR GENERATING STATION LICENSE RENEWAL APPLICATION

On April 20, 2006, the U.S. Nuclear Regulatory Commission (NRC) staff met with representatives of AmerGen Energy Company, LLC (the applicant) in a public meeting to discuss the results of the aging management review (AMR) and aging management program (AMP) audits supporting the review of the license renewal application for the Oyster Creek Nuclear Generating Station. The application was submitted by letter dated July 22, 2005. The list of attendees is provided in the Enclosure.

The NRC staff provided an overview of the areas reviewed during the audit, as well as the results of the review. The staff determined the applicant's AMP and AMR was conducted using a sound, well organized process, and that the processes were implemented consistent with the applicant's procedures. The staff reported that three areas needed further evaluation. These are (1) Metal Fatigue of Reactor Coolant Pressure Boundary, (2) ASME Section XI, Subsection IWE, for Mark 1 Containment and (3) Protective Coating Monitoring and Maintenance Program for drywell and torus corrosion.

The staff also answered numerous questions from the public regarding the methods used during the Oyster Creek audit and the license renewal process in general.
