Curt Cannon
Radiation Safety Officer
Pacific EcoSolutions
2025 Battelle Boulevard
Richland, WA 99354

Dear Mr. Cannon:

On behalf of the Nuclear Regulatory Commission (NRC), I am confirming receipt of your letter dated July 14, 2006, concerning developments related to NRC import license IW006, which was issued to Allied Technology Group, Inc. (ATG) on September 8, 1998, and authorized imports of radioactive waste from Taiwan Power Company. When that license was issued, ATG planned to dispose of secondary waste resulting from the decontamination of materials imported from Taiwan at US Ecology's low-level waste disposal facility in Richland, Washington.

We appreciate receiving notice that your company purchased ATG assets, and has consulted Washington State officials about pursuing alternative arrangements to dispose of the materials imported from Taiwan. At this point in time, we agree that this is now a domestic licensing matter, and as long as the arrangements are acceptable to interested State officials, NRC has no objection.

Thank you for bringing this matter to our attention.

Sincerely,

/RA/

Margaret M. Doane, Deputy Director
Office of International Programs
