# **NRC/NEI Meeting on Path Forward for Generic Safety Issue 191**

**Presented by:  
Jon Hopkins  
Office of Nuclear Reactor Regulation  
May 23, 2006**

---

# Purpose of Meeting

---

- Develop clear understanding between the NRC and NEI regarding path forward and actions needed to bring GSI-191 to closure

# Topics

---

- Chemical effects
- Downstream effects
- Coatings
- Near-field effect

# Basic Process for Each Topic

---

- NRC will summarize planned path forward
  - Planned NRC actions
  - Expectations of industry/licensees
- NEI may provide perspective, present alternative views or proposals
- Two-way discussion of any differences or perceived issues

# Basic Process (cont'd)

---

- Caucus: NRC and NEI/industry participants separately discuss issues noted during the meeting and develop written list of proposed agreements and action items (generally, changes from NRC-proposed path forward)
- Wrap-up: Using outputs from caucuses, achieve agreement on path forward and action items to be included in meeting summary
