SUBJECT: PRE-APPLICATION ACTIVITIES REGARDING LICENSE RENEWAL
APPLICATION REVIEW SCHEDULE FOR SUSQUEHANNA STEAM ELECTRIC
STATION, UNITS 1 AND 2 (TAC NOS. MD0547 AND MD0548)

Dear Mr. McKinney:

During a public meeting held on April 5, 2006, the U.S. Nuclear Regulatory Commission (NRC or the staff), and representatives of PPL Susquehanna, LLC (or PPL), discussed the approach and schedule for submitting an application for license renewal (LR) in conjunction with a request for a 14 percent extended power uprate (EPU) for Susquehanna Steam Electric Station, Units 1 and 2. The meeting summary can be accessed in the Agencywide Documents Access and Management System, under (Accession No. ML061720220).

PPL indicated that they would be filing an application for the EPU this year, and that the information demonstrating that the license renewal evaluations bound the uprated conditions, would also be submitted at the time of the staff's approval of the EPU. The LR review would need to consider changes in the current licensing basis (CLB) made as a result of approval of the EPU, and changes in the scope of aging management resulting from the EPU bounding condition. Certain portions of the LR review that are not impacted by the EPU review may be conducted upon successful docketing and acceptance review of the application. Upon approval of the EPU license amendment request, PPL will need to submit an amended LRA at the new power level. Upon receipt of this amended application, NRC staff will establish the review schedule of 22-month without a hearing or 30-month with a hearing requested and granted. This letter was discussed with your staff in a teleconference held on July 26, 2006.

Sincerely,

/RA/

Yaira Diaz Sanabria, Project Manager
License Renewal Branch A
Division of License Renewal
Office of Nuclear Reactor Regulation

Docket Nos. 50-387 and 50-388
