

August 2, 2006

LICENSEE: Exelon Generation Company, LLC  
FACILITY: Braidwood Station, Units 1 and 2  
SUBJECT: SUMMARY OF THE JULY 31, 2006, PUBLIC MEETING TO DISCUSS THE  
BRAIDWOOD UNITS 1 AND 2 END-OF-CYCLE PLANT PERFORMANCE  
ASSESSMENT

On July 31, 2006, the Nuclear Regulatory Commission (NRC) held a public meeting at the Reed-Custer High School in Braidwood, IL. The meeting was between NRC Region III management and Exelon Generation Company management to discuss the NRC's assessment of Braidwood Unit 1 and 2's safety performance for the period from January 1 through December 31, 2005. The meeting notice and NRC presentation can be found in the Agencywide Documents Access and Management System (ADAMS) as ML061860739 and ML062140587, respectively. A list of NRC and licensee meeting participants and other attendees can be found in the attached Enclosure.

The NRC began the meeting with an overview of the NRC's Reactor Oversight Program (ROP), national ROP results, and the Action Matrix in general. This was followed by a discussion of the NRC's assessment of Braidwood Unit 1 and 2's performance in calendar year 2005, which was documented in the March 2, 2006, end-of-cycle assessment letter as ML060610281. As part of this regulatory performance meeting, Exelon briefly responded to the NRC's assessment. At the end of the meeting, members of the public were given the opportunity to ask questions of NRC officials and Exelon representatives.

Sincerely,

**/RA/**

Richard A. Skokowski, Chief  
Branch 3  
Division of Reactor Projects
