Excellent summary.

lots of provocative stuff here.

Glenn - please get up to speed on where we are with this review and meet with me some morning this week, maybe weds. Should we maintain course, expand to 'SCWE insp', issue chilling effect, or take other action?

Also, we need to have good tech issue coord; Ted highlights some items that will need inso follow-up.

Ted - in response to one of your musings, yes, i believe indep verification is traceable to a regulatory req't.

The expectation was levied in the TMI action plan (probably via Nureg 0737, and item #I.C.8 sticks in my mind); later most of the items were formalized via confirmatory orders.
