Acuren USA
ATTN: Lloyd A. Gray
Radiation Safety Officer
101 Underwood Rd., Bldg J
La Porte, TX 77571

SUBJECT: LICENSE AMENDMENT

Please find enclosed Amendment No. 07 to License No. 42-32443-01, **authorizing the use of the IRIS-1A device identified in items 6.I. and 6.J., and the use of the AEA Technology exposure device Model 865 identified in license condition 10.N. This license amendment does not authorize source exchange activities for the AEA Technology exposure device Model 865. The Model 865 exposure device must be returned to AEA Technology for loading or unloading of a source assembly. In addition and as agreed upon, you must submit to this office within 30 days Acuren's revised Operating and Emergency procedures to reflect the inclusion of Model 865 exposure device.** An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14)(vi). You should review this license carefully and be sure that you understand all conditions. If you have any questions, please contact me at 817-860-8189.

Please note that the sealed sources identified in items 6.K., 6.L., and 6.M. continue to be authorized for possession and storage only. To allow use of these sealed sources you will have to submit a copy of the Sealed Source and Device Registration certificate and model number for the devices that will be used in conjunction with the sealed sources identified in items 6.K., 6.L., and 6.M.

NRC's Regulatory Issue Summary (RIS) 2005-31, provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/>. Pursuant to NRC's RIS 2005-31, the enclosed materials license will not be made publicly available.

In addition, please note that NRC Form 313 requires the applicant, by signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for the application should be the licensee or certifying official rather than a consultant. Since the NRC also accepts a letter requesting amendment or renewal of an NRC license, the signatory for such a request should also be the licensee or certifying official rather than a consultant.

NRC will periodically inspect your radiation safety program. Failure to conduct your program according to NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available on the following internet address: <http://www.nrc.gov/what-we-do/regulatory/enforcement/enforc-pol.pdf>.

The NRC no longer publishes the NRC Rules and Regulations loose leaf supplements. However, an electronic version of the NRC's regulations is available on the NRC Web site at www.nrc.gov. To view these regulations, highlight "Electronic Reading Room" and choose "Regulations" on the drop down menu. An electronic version of the NUREG-1556 Series publications is also available on the NRC Web site. To view these guidance documents, highlight "Electronic Reading Room"; choose "All Document Types" on the drop down menu; scroll down to "NUREG-Series Publications"; and select "Publications Prepared by the NRC Staff". Then, choose "NUREG-1556" from the table and select the appropriate volume(s) for your license type.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this cover letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/

Roberto J. Torres, Senior Health Physicist
