Russ,

My boss, Dwight Chamberlain, has asked to arrange a conference call on Thursday to discuss the Cooper SPAR model treatment of a loss of service water, and whether the model should be modified to account for strategies the licensee has devised to cope with a loss of service water.

We sent a description of the issue last week.

Desired participants- Tschiltz, Richards, O'Reilly, someone from reactor systems. you , and anyone else you think. It could be almost anytime on Thursday, but certain times will not work for us.

Let me know if this is possible. I realize we are dealing with a lot of heavily-scheduled people.

Mike

CC: David Loveless; Dwight Chamberlain; Michael Tschiltz; Patrick O'Reilly; Russ Bywater; Stuart Richards
