Lehighton, PA 18235

SUBJECT: INSPECTION 03033333/2005001 AND OFFICE OF INVESTIGATION (OI)
CASE 1-2005-032, JOINT CENTER FOR THERAPEUTIC ONCOLOGY (JCTO)
OF CARBON COUNTY

Dear Dr. Moylan:

This letter forwards NRC Form 591, "Safety Inspection," which documents the results of the above described inspection and OI investigation of your licensed activities. The inspection was a review of activities authorized by your NRC license and the purpose of the OI investigation, based upon preliminary inspection findings, was to determine if Depleted Uranium (DU) was used in a willful manner not authorized by your license. Upon completion of the inspection, no items of non-compliance with NRC requirements were noted. With respect to the OI investigation; although OI determined that JCTO willfully removed DU from linear accelerators, upon further review, we have concluded that this use of DU was not prohibited by your license. Therefore, no violation occurred.

Please retain the form in your files. No acknowledgment of this letter is required. However, should you have any questions, we shall be pleased to discuss them with you.

Current NRC regulations are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Academic, and Industrial Uses of Nuclear Material**; then **Toolkit Index Page**. The current Enforcement Policy is included on the NRC's website at www.nrc.gov; select **What We Do, Enforcement**, then **Enforcement Policy**. Or you may obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-888-293-6498. The GPO is open from 7:00 a.m. to 8:00 p.m. EST, Monday through Friday (except Federal holidays).

Your cooperation with us is appreciated.

Sincerely,

Original signed by George Pangburn
