**SUSQUEHANNA STEAM ELECTRIC STATION
RENEWAL REQUEST OF QA PROGRAM APPROVAL
FOR RADIOACTIVE MATERIAL PACKAGES
PLA-6083**

**Docket Nos. 50-387
and 50-388**

PPL Susquehanna, LLC (PPL), as holder of License No's NPF-14 and NPF-22, requests NRC renewal of our Quality Assurance Program for Radioactive Material Packages No. 0471, which expires on September 30, 2006.

PPL will continue to conduct activities regulated by 10CFR71 pursuant to a QA Program that complies with the requirements of 10CFR71, Subpart H - Quality Assurance, by applying the QA requirements of our 10CFR50, Appendix B, program to radioactive material packaging. Since the PPL Operational Quality Assurance Program (described in Susquehanna Steam Electric Station-FSAR Sections 13.4 and 17.2) represents an approved quality assurance program relative to 10CFR50, Appendix B, PPL concludes that it also complies with 10CFR71, Subpart H.

Sincerely,

Richard D. Fogolin
for B. T. McKinney
