TRAINING: None

REMARKS: IP 83801 (Inspection of Remedial and Final Surveys at Permanently Shutdown Reactors) has been revised to incorporate lessons learned from Maine Yankee and Trojan.

IP 88005 (Management Organization and Controls) has been revised to: (1) emphasize the risk-informed, performance-based approach to inspection, (2) impose changes to the core inspection program based on operating experience, and (3) remove completed or obsolete Manual Chapters (MCs) and incorporate other fuel cycle MCs into a central location.

IP 88010 (Operator Training/Retraining) has been revised to: (1) emphasize the risk-informed, performance-based approach to inspection, (2) impose changes to the core inspection program based on operating experience, and (3) remove completed or obsolete Manual Chapters (MCs) and incorporate other fuel cycle MCs into a central location.

IP 88015 (Nuclear Criticality Safety Program) has been revised to: (1) emphasize the risk informed, performance based approach to inspection, (2) impose changes to the core inspection program based on operating experience, and (3) remove completed or obsolete Manual Chapters (MCs) and incorporate other fuel cycle MCs into a central location.

IP 88020 (Operational Safety) has been revised to: (1) emphasize the risk-informed, performance-based approach to inspection, (2) impose changes to the core inspection program based on operating experience, and (3) remove completed or obsolete Manual Chapters (MCs) and incorporate other fuel cycle MCs into a central location.

IP 88045 (Effluent Control and Environmental Protection) has been revised to: (1) emphasize the risk-informed, performance-based approach to inspection, (2) impose changes to the core inspection program based on operating experience, and (3) remove completed or obsolete Manual Chapters (MCs) and incorporate other fuel cycle MCs into a central location.

IP 88050 (Emergency Preparedness) has been revised to reduce duplication and improve effectiveness and efficiency by incorporating and consolidating inspection requirements involving emergency preparedness and removing inspection requirements for evaluation of exercises and drills.

IP 88055 (Fire Protection) has been revised to: (1) emphasize the risk-informed, performance-based approach to inspection, (2) impose changes to the core inspection program based on operating experience, and (3) remove completed or obsolete Manual Chapters (MCs) and incorporate other fuel cycle MCs into a central location.

IP 88070 (Permanent Plant Modifications) has been issued because of the need for a new inspection procedure for Permanent Plant Modifications.

DISTRIBUTION: Standard
