ATTN: Judy Justa

Ms. Justa,

As per our phone conversation earlier today, 8/28/06, we at Schnabel Engineering no longer wish to pursue the request for amendment of our NRC License, adding the Spec300 Cobalt 60 exposure device. We would like to continue the amendment regarding the addition of another office location, please refer to the letter dated 8/6/2006. I wish to apologize for any confusion or inconvenience this may have caused, and hope this does not impede the amendment process. I would also like to apologize if I misspelled your name. Thank you and have a great day.

Regards,

Jackie Riggs, Jr.
