Sequoyah-1 & 2		Wolf Creek	
Watts Bar-1		Diablo Canyon-1 & 2	07/12/05
		Fermi-2	
		Columbia	
		Comanche Peak-1 & 2	

\* The planned next phase will result in each site performing a drill involving a security event-based scenario over the next three years, beginning in September 2006. These drills would not be conducted as part of a biennial exercise but rather during an off-year exercise, drill or any other time convenient to the participating organizations. The NRC and DHS are welcome to participate and observe at their discretion. In keeping with the NRC's Regulatory Oversight Process, it is intended that ERO members assigned to fill Key Positions be granted credit for ERO Participation when they have taken part in a security event-based drill conducted in accordance with the guideline. During this phase, NEI will track the schedule for security event-based drills, coordinate a workshop to support a consistent application of the guideline, and keep the NRC and DHS informed of lessons learned.
