September 8, 2006

Docket No. 03037208  
Control No. 138836

License No. 45-31125-02MD

Allen C. Jones, R.Ph.  
Radiation Safety Officer  
Radiology Services of Northern Virginia  
13870 Park Center Road  
Building #5, Bay #22  
Herndon, VA 20171-3216

SUBJECT: RADIOLOGY SERVICES OF NORTHERN VIRGINIA, CORRECTED COPY OF  
LICENSE, CONTROL NO. 138836

Dear Mr. Jones:

Enclosed is the Corrected Copy of License No. 45-31125-02MD. In accordance with an administrative review of the license, it was determined that the mailing address and the place of use was incorrect. License Conditions 2 and 10 have been changed to reflect the correct address of 13870 Park Center Road instead of 13870 Park Center Drive.

We apologize for any inconvenience this error may have caused.

Sincerely,

***Original signed by James P. Dwyer***

James P. Dwyer, Chief  
Commercial and R&D Branch  
Division of Nuclear Materials Safety

Enclosure:  
Corrected Copy of License No. 45-31125-02MD

DOCUMENT NAME: G:\Docs\Mailed\Lic Cvr Letter\45-31125-02.138836.09112006.wpd

**MATERIALS LICENSE**

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Licensee  1. Radiology Services of Northern Virginia  2. 13870 Park Center Road, Building #5, Bay #22 Herndon, Virginia 20171-3216	3. License number 45-31125-02MD  4. Expiration date May 31, 2016  5. Docket No. 03037208 Reference No.
---	---

6. Byproduct, source, and/or special nuclear material	7. Chemical and/or physical form	8. Maximum amount that licensee may possess at any one time under this license
A. Any byproduct material with atomic numbers 1-83 except molybdenum 99, technetium 99m, yttrium 90, iodine 131 and xenon 133	A. Any	A. 100 millicuries per radionuclide and 1 curie total
B. Yttrium 90	B. Any	B. 200 millicuries
C. Molybdenum 99	C. Any	C. 200 curies
D. Technetium 99m	D. Any	D. 200 curies
E. Iodine 131	E. Any	E. 2 curies
F. Xenon 133	F. Any	F. 2 curies
G. Any byproduct material in a brachytherapy source as listed in 10 CFR 35.400	G. Sealed sources (See condition 21)	G. 500 millicuries
H. Any byproduct material in a sealed source for diagnosis listed in 10 CFR 35.500	H. Sealed Sources (See condition 21)	H. 1.5 curies per source and 5.5 curies total
I. Any byproduct material listed in 10 CFR 31.11(a)	I. Prepackaged units for in vitro diagnostic tests	I. 50 millicuries
J. Any byproduct material identified in 10 CFR 35.65(a)	J. Sealed Sources (See condition 21)	J. 300 millicuries

9. Authorized use:

- A. Through F. Preparation and distribution of radioactive drugs including compounding of I-131 and redistribution of used and unused molybdenum 99/technetium 99m generators to authorized recipients in accordance with 10 CFR 32.72. Preparation and distribution of radioactive drugs and radiochemicals including compounding of I-131 and redistribution of used and unused molybdenum 99/technetium 99m generators to authorized recipients for non-medical use.
- G. and H. Redistribution for medical use of sealed sources initially distributed by a manufacturer licensed pursuant to 10 CFR 32.74. Redistribution for non-medical use of sealed sources that have been registered either with the Nuclear Regulatory Commission under 10 CFR 32.210 or with an Agreement State and have been distributed in accordance with a Commission or Agreement State specific license authorizing distribution to persons specifically authorized by a Commission or Agreement State license to receive, possess and use the devices.
- I. Redistribution to specific licensees or general licensees pursuant to 10 CFR 31.11 provided the packaging and labeling remain unchanged.
- J. Calibration and checking of the licensee's instruments. Redistribution of sealed sources initially distributed by a manufacturer licensed pursuant to 10 CFR 32.74 to authorized recipients and to authorized recipients for non-medical use.
- K. Shielding for molybdenum-99/technetium-99m generators.

**CONDITIONS**

10. Licensed material may be used or stored only at the licensee's facilities located at 13870 Park Center Road, Building #5, Bay #22, Herndon, Virginia.
11. Licensed material shall be used by, or under the supervision of:
- A. A pharmacist working or designated as an authorized nuclear pharmacist in accordance with 10 CFR 32.72(b)(2)(i) or (4).
- B. Authorized nuclear pharmacists: James Babb, Craig C. Barlow, Scott C. Brower, Thanh Huynh, Allen C. Jones, Steven Mize, Amy Smith, John M. Tabb, Jr., John Thomas, Rebecca Wynn and Tim Younklin.

12. The Radiation Safety Officer for this license is Allen C. Jones, R.Ph., PharmD.
13. In addition to the possession limits in Item 8, the licensee shall further restrict the possession of licensed material to quantities below the minimum limit specified in 10 CFR 30.35(d) for establishing decommissioning financial assurance.
14. This license does not authorize commercial distribution of licensed material to persons exempt from licensing pursuant to 10 CFR 30.14 through 30.21, inclusive, or equivalent regulations of any Agreement State.
15. A. Sealed sources shall be tested for leakage and/or contamination at intervals not to exceed the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State.
- B. Notwithstanding Paragraph A of this Condition, sealed sources designed to primarily emit alpha particles shall be tested for leakage and/or contamination at intervals not to exceed 3 months.
- C. In the absence of a certificate from a transferor indicating that a leak test has been made within the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State, prior to the transfer, a sealed source received from another person shall not be put into use until tested and the test results received.
- D. Sealed sources need not be tested if they contain only hydrogen-3; or they contain only a radioactive gas; or the half-life of the isotope is 30 days or less; or they contain not more than 100 microcuries of beta- and/or gamma-emitting material or not more than 10 microcuries of alpha-emitting material.
- E. Sealed sources need not be tested if they are in storage and are not being used; however, when they are removed from storage for use or transferred to another person and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.
- F. The leak test shall be capable of detecting the presence of 0.005 microcurie (185 becquerels) of radioactive material on the test sample. If the test reveals the presence of 0.005 microcurie (185 becquerels) or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission in accordance with 10 CFR 30.50(c)(2), and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations.
- G. Tests for leakage and/or contamination, including leak test sample collection and analysis, shall be performed by the licensee or by other persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.

**MATERIALS LICENSE  
SUPPLEMENTARY SHEET**License Number

- H. Records of leak test results shall be kept in units of microcuries and shall be maintained for 5 years.
16. Sealed sources or detector cells containing licensed material shall not be opened or sources removed from source holders by the licensee.
17. The licensee shall conduct a physical inventory every six months, or at other intervals approved by the U.S. Nuclear Regulatory Commission, to account for all sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 5 years from the date of each inventory and shall include the radionuclides, quantities, manufacturer's name and model numbers, and the date of the inventory.
18. The licensee is authorized to hold byproduct material with a physical half-life of less than 120 days for decay-in-storage before disposal without regard to its radioactivity if it:
- A. Monitors byproduct material at the surface before disposal and determines that its radioactivity cannot be distinguished from the background radiation level with an appropriate radiation detection survey meter set on its most sensitive scale and with no interposed shielding; and
  - B. Removes or obliterates all radiation labels, except for radiation labels on materials that are within containers and that will be managed as biomedical waste after they have been released from the licensee; and
  - C. Maintains records of the disposal of licensed materials for 3 years. The record must include the date of disposal, the survey instrument used, the background radiation level, the radiation level measured at the surface of each waste container, and the name of the individual who performed the disposal.
19. The licensee is authorized to retrieve, receive and dispose of radioactive waste from its customers limited to radiopharmacy supplied syringes and vials and their contents.
20. The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."

21. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.

A. Application dated January 22, 2006 [ML061350321]

For the U.S. Nuclear Regulatory Commission
